行业背景 Background

塑料回收再生与循环经济已成为紧密联系着全球环境保护和可持续发展的紧迫议题。**联合国环境规划署 (UNEP) 政府间谈判委员会 (INC)** 第五轮谈判于11月底在韩国釜山举行，旨在制定一项全面而有效的国际法律框架，以遏制废塑料污染，保护全球生态环境。

Plastics recycling and the circular economy have emerged as critical issues intertwined with global environmental protection and sustainable development. At the end of November, the fifth session of **the United Nations Environment Programme (UNEP) Intergovernmental Negotiating Committee (INC)** convened in Busan, Republic of Korea. The primary goal was to develop a comprehensive and effective international legal framework to combat plastics pollution and safeguard the global ecological environment.

欧盟、北美以及亚太地区都在积极推动塑料回收行业的发展，通过制定相关政策和法规来促进塑料的回收利用。例如，**欧盟委员会**提出在制造新车的塑料中，25%必须来自回收材料，其中25%必须从报废车辆中回收；报废车辆中30%的塑料应回收利用。 

The European Union, North America, and the Asia-Pacific region are all actively advancing the development of the plastics recycling industry through the implementation of relevant policies and regulations. For instance, **the European Commission** has proposed that 25% of the plastics used in new cars must be sourced from recycled materials, with a specific requirement that 25% of this recycled content comes from End-of-Life Vehicles (ELVs). Additionally, it aims for 30% of the plastics in ELVs to be recycled.

中国作为世界上最大的塑料生产国和消费国之一，近年来大力推动**绿色低碳和循环经济**。2024年，中国首次将“塑料污染治理”纳入政府工作报告，标志着**塑料回收再生行业**向“循环”大转折的重要一步。 

As one of the world's largest producers and consumers of plastics China has actively promoted a **green, low-carbon, and circular economy** in recent years. In 2024, for the first time, the government work report included "plastic pollution control", marking a significant step towards transitioning the **plastics recycling industry** to a circular model.

CHINAPLAS x CPRJ塑料回收再生与循环经济论坛暨展示会正是在这样的大背景下召开，旨在汇聚政府、行业组织、品牌商、材料及机械供应商等多方力量，聚焦塑料循环经济全球新趋势，剖析包装、汽车、消费电子及消费品行业的环保政策及低碳创新案例，为业界清晰勾勒亚洲乃至全球塑料回收再生产业的格局与前景。

The CHINAPLAS x CPRJ Plastics Recycling and Circular Economy Conference and Showcase is organized in this context. The conference aims to unite **governments, industry organizations, brands, materials and machinery suppliers**, and other stakeholders to discuss global trends in the circular economy of plastics. Experts will analyze environmental protection policies and low-carbon innovations across the **packaging, automotive, consumer electronics, and consumer goods**, providing a comprehensive overview of the development of the plastics recycling industry in Asia and worldwide.
