Honorable Speakers

Janet Tong
Vice General Manager
Adsale Publishing Ltd

Ruoming Hou
Director
Planning Plant System, FAW

Yunsheng Cai
Vice Chief
Auto Manuf. Dep., SAEC

Kai Zheng
Secretary General
China Synthetic Resin Supply and Sale Association

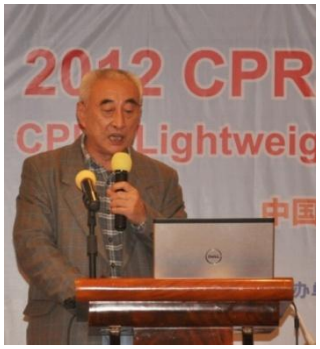
Jinghua Li
Senior Engineer
Non-metallic Research, FAW

Benson Liu
Area Sales Manager
Conair Trading Co., Ltd

Petunia Pang
Territory Accounts Sales Manager
-Engineering Polymer Group
Chevron Phillips Chemical International Inc.

Hua Qian
Vice Director
Shanghai Academy of Environmental Sciences, Atmospheric Environmental Institute

Tom Chen
Automotive Key Account Manager
Bayer Material Science (China) Co., Ltd



Dahua Li
Chief Engineer
Shenzhen Institute of Vehicle Network Lab

Qiang Li
Product R&D Manager
Shanghai Kumhosunny Plastics Co., Ltd

Yijiang Wang
General Manager of Consumer Dep.
DEKRA WIT

Conference Agenda

Conference: 18 October, Full day			
Time	Topics	Speaker	Position
9:00-9:30	Opening Ceremony	Janet Tong	Vice General Manager of Adsale Publishing Ltd
		Ruoming Hou	Director, Planning Dept.China FAW Group Corporation
		Yunsheng Cai	Vice Chief of Auto Manuf.Dep.,CSAE
9:30-10:00	Opportunity and challenge in the new situation: the development of engineering plastics in automotive industry	Kai Zheng	Secretary General of China Synthetic Resin Supply and Sale Association
10:05-10:35	Application of Glass fiber reinforced material in automotive interiors and exteriors	Jinghua Li	Senior Engineer of Technical Center Non-metallic Research,China FAW Group Corporation
10:55-11:25	Conair central conveying and Resinwork drying system bring flexible and reliable process for automotive industry	Benson Liu	Area Sales Manager of Conair Trading (Shanghai) Co., Ltd
11:30-12:00	PPS used in Automotive application	Petunia Pang	Territory Accounts Sales Manager-Engineering Polymer Group of Chevron Phillips Chemical International Inc.
13:30-14:00	The solution for indoor (vehicle) air pollution and the interpretation of “Guideline” and “Method”	Hua Qian	Vice Director of Shanghai Academy of Environmental Sciences, Atmospheric Environmental Institute
14:05-14:35	Bayer lightweight solution with Low VOC properties for automotive industry	Tom Chen	Automotive Key Account Manager of Bayer Material Science (China) Co., Ltd
14:40-15:10	Application of engineering plastics in automotive weight reduction	Dahua Li	Chief Engineer of Shenzhen Institute of Vehicle Network Lab
15:30-16:00	The solution for interior VOC materials in automobiles	Qiang Li	Alloy Product R&D Manager of Shanghai Kumhosunny Plastics Co Ltd
16:05-16:35	The test of automotive interior: focus on automobile emission control	Yijiang Wang	General Manager of Consumer Dep., DEKRA WIT
16:40-16:50	Conclusion		
17:00	Welcome Banquet		
Visiting FAW : 19 Octorber, Half day			
9:00-11:00	Visiting FAW		

CPRJ Lightweight Automobile & Interior VOC Emission Control Conference 2012

Time: 18th -19th October 2012,
Place: New Century Grand Hotel, Changchun, China
Organizers: CPRJ China Plastic & Rubber Journal, www.AdsaleCPRJ.com ,
Adsale Publishing Ltd, China FAW Group Corporation (Planning Plant System),
Co-Organizers: CHINAPLAS, China Auto Conference Network

Field Visit in FAW assembly plant and Hongqi's showroom

As one of the most important contents of conference, and with great support from FAW, CPRJ led experts and delegates to visit FAW assembly plant and Hongqi's showroom.

Summary

CPRJ Lightweight Automobile & Interior VOC Emission Control Conference 2012, organized by Adsale Publishing Ltd, CPRJ China Plastic & Rubber Journal and FAW Group. 182 people had registered before the Conference, and 156 of them showed up finally. They were from industry associations, research institutes and well known suppliers of automotive plastics. It is noteworthy that more than 100 delegates of Automotive OEMs and Parts attended this Conference such as FAW R&D Centre Non-Metal Material Department, FAW JIEFANG, FAW Car, FAW-VOLKSWAGEN, ZHENGZHOU YUTONG BUS, Hyundai Motor, Klear Automobile Parts, Shichang Automobile Parts, BYD Auto, BEIQI FOTON, HAIMA Automobile, CHANGHE Automobile, BAIC Motor, Xiamen King Long United Automotive, Huachen Auto, SAIC GM Wuling Automobile and FAWAY Automobile.

On the topics of “Lightweight Automobile & Interior VOC Emission Control”, the speakers emphasized the development and tendency of strengthening product development capabilities of enterprises in the auto plastics industry. Meanwhile, they also introduced the latest applications of lightweight technology to the enterprises so as to uplift the level of “China auto manufacturing”.

Zheng Kai, Deputy Director of the National General Engineering Plastics Engineering Technology Research Center and Secretary-General of the China Engineering Plastics Industry Association, Secretary-General of China Synthetic Resin Supply and Marketing Association, gave a speech on "The Chinese Market for High Performance Materials: Analysis and Outlook". Li Jinghua, Senior Engineer of Technical Center Non-metallic Research, China FAW Group Corporation, shared her views on the "Application of Glass fiber reinforced material in automotive interiors and exteriors".

CPRJ Lightweight Automobile & Interior VOC Emission Control Conference 2012

Time: 18th -19th October 2012,
Place: New Century Grand Hotel, Changchun, China
Organizers: CPRJ China Plastic & Rubber Journal, www.AdsaleCPRJ.com ,
Adsale Publishing Ltd, China FAW Group Corporation (Planning Plant System),
Co-Organizers: CHINAPLAS, China Auto Conference Network

Qian Hua, Vice Director of Shanghai Academy of Environmental Sciences, Atmospheric Environmental Institute, Vice Director of SAES Environmental Testing Laboratory, covered the topic of "The solution for indoor (vehicle) air pollution and the interpretation of 'Guideline' and 'Method'". Tom Chen, Automotive Key Account Manager of Bayer Material Science, presented the "Bayer lightweight solution with Low VOC properties for automotive industry". Benson Liu, Area Sales Manager of Conair Group, explained to the audience about how "Conair central conveying and Resinwork drying system bring flexible and reliable process for automotive industry".

Petunia Pang, Territory Accounts Sales Manager, Engineering Polymer Group, Chevron Phillips Chemical International Inc., talked about "PPS used in Automotive application". Li Qiang, Alloy Product R&D Manager of Shanghai Kumhosunny Plastics Co Ltd, on "The solution for interior VOC materials in automobiles"; Shenzhen Institute of Vehicle Network Lab; DEKRA, the German Motor Vehicle Inspection Association, and its experts from Hangzhou, China (DEKRA WIT) also gave their experts insights.

Prior to that, Janet Tong, Vice General Manager of Adsale Publishing Limited; Hou Ruoming, Director of Planning Plant System, China FAW Group Corporation and Cai Yunsheng, Vice Chief of Auto Manufacturing Department of Society of Automotive Engineers of China, gave their welcoming speech.

On the second day of the event, participants, led by Mr Hou, got a chance to visit the FAW assembly plant and Hongqi's showroom in the morning. Most of the guests believed the forum has presented them a clear insight on automotive weight reducing and VOC emission control. It also served as a platform to enhance the cooperation between the automotive and plastics industry.

CPRJ Lightweight Automotive & Interior VOC Emission Control Conference 2012 also gained the huge support from CHINAPLAS, the No 2 plastics trade show in the world
